

Build & Refit Checklist

Prepare for a technical review | Planning aid

- ☐ Yacht builder/model or refit context; yard window and handover target.
- ☐ Equipment makes/models, firmware if known, interfaces and required readings/actions.
- ☐ Appliance/rack location, Ethernet routes, PoE demand and selected UPS loads.
- ☐ Display locations: helm, engineering, salon, cabins and crew spaces.
- ☐ Fixed marine displays or removable iPad companion displays.
- ☐ Owner, captain, engineering, crew and guest permissions; separate Cloud access.
- ☐ Source identification, reading checks and permitted-action confirmation.
- ☐ Loss of internet, stale/missing sources and local-operation acceptance checks.
- ☐ System map, display/role configuration and commissioning record.
- ☐ Backup/recovery checks and operator introduction agreed for handover.

Share the initial brief safely. Keep credentials, private footage, precise vessel location and network details out of the initial email.

Use this checklist to agree the yacht-specific equipment, responsibilities, commissioning checks and handover. It does not establish compatibility or replace the installation specification.
